PERSONAL

I am a Robotics & Automation engineering student with a strong passion for designing intelligent embedded systems and autonomous robots. I enjoy transforming ideas into working prototypes using Arduino, ESP32, sensors, IoT platforms, and flight controllers. My primary interests include:

- Robotics
- Embedded Systems
- Autonomous Drones
- IoT
- Artificial Intelligence
- Computer Vision

I continuously build practical projects to strengthen my engineering skills and gain hands-on experience with real-world technologies.

PROJECTS

Smart Home Automation System

- Technologies: ESP32, IoT, Blynk
- Developed a system for remote control of home appliances via a mobile app.

IoT Smart Irrigation System

- Technologies: ESP32, Soil Moisture Sensor, Relay
- Created a system that automates irrigation by monitoring soil moisture levels.

Automatic Smart Dustbin

- Technologies: Arduino Uno, Ultrasonic Sensor, Servo Motor
- Built a touchless dustbin with automatic lid operation using ultrasonic sensors.

Quadcopter Drone

- Technologies: APM Flight Controller, Brushless Motors
- Assembled and configured a quadcopter to understand UAV flight dynamics.

Sign Language Translator Glove

- Technologies: ESP32, Flex Sensors, LCD
- Developed a glove to translate hand gestures into text, aiding communication.

Obstacle Avoidance Robot

- Technologies: Arduino Nano, Ultrasonic Sensor, Motor Driver
- Designed a robot that autonomously detects and avoids obstacles.

EXPERIENCE

volunteer – College hackathon Club
2025 – Present

- coordinate and support the participants
- Coordinated with event organizers and team and get the necessary supports
- ensure the stage is set up properly and every thing is going on smoothly

participated in science expo events

participated in new horizon college robot competition

ACHIEVEMENTS

- Winner – college science expo
- Participated in hackathons
- Participated in line following robot competition

HOBBIES

- programming
- Designing

EDUCATION

pre university college
(20023–2025)

St. francis pu college

Bachelor of engineering in
Robotics and Automation
(2025– Present)

Rajarajeswari college of engineering

SKILLS

TECHNICAL STRENGTHS

- Embedded Systems Development
- Robotics Prototyping
- Sensor Interfacing
- IoT System Design
- Hardware Debugging
- Rapid Prototyping
- Circuit Design
- Electronics Troubleshooting

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication
- Quick Learning
- Creativity
- Time Management

LANGUAGES

English
kannada
Hindi
